SUMMARY

I am a PhD candidate in Economics at King's College London and an Economic Consultant at the OECD, specializing in trade and production networks.

Using detailed firm-level data, I study how large firms transmit shocks and spillovers through production networks, and how these dynamics shape broader economic outcomes.

With experience across both academic and policy research, I combine quantitative methods and microdata to conduct rigorous analysis, translating data-driven insights into actionable economic and public policy.

WORK EXPERIENCE

OECD

Paris, France

Economic Consultant — Environment Directorate (ENV)

2026 - Present

Conducting an econometric assessment of nature-related financial risks for the [National Bank of Georgia](#).
